

RT Level II Technician Job Opening

SUMMARY OF POSITION:

Individual will work in our Industrial Radiography Department.

Individual must work closely and effectively with other departments to keep work running smoothly and efficiently through our cleaning / upgrade department, to and from outside services, and assuring on time shipment of product to customers.

ESSENTIAL FUNCTIONS:

The primary responsibilities of the RT Level II are as follows:

- Perform full scale radiographic duties (expose film / imaging plates with different radiographic sources, develop film / imaging plates, interpret film / images, complete all certifications, develop techniques, create radiographic shooting sketches, etc.).
- Communicate with radiographers on other shifts to ensure work is smoothly transitioned between shifts.
- Maintain film processing equipment.
- Strive for on time delivery, improved efficiency, and professionalism.

EDUCATION AND EXPERIENCE REQUIREMENTS:

- Certification as an Industrial Radiographer Level II is required and must be kept current.
- Minimum of 5 years' experience in a NDT environment. 10 years preferred.
- Must be proficient in Microsoft packages and have experience in manufacturing systems
- Digital / computed radiographic experience preferred. Will train if necessary.
- 630 hours experience and 40 hours of classroom required to become CR Level II.
- Professional verbal and written communication skills.
- Enthusiastic; individual must possess a positive "can do" attitude.

SCOPE:

Position reports to NDT Supervisor

The above statements are intended to describe the general nature and level of work being performed by people assigned to this position. They are not intended to be an all-encompassing list of responsibilities, duties, and skills required of personnel so classified. Reasonable accommodations to essential functions of the position will be made if necessary.
